- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions
Altered vision

Eye or muscle twitching
Involuntary movements

Loss of awareness
Disorientation

- To reduce the likelihood of a seizure when playing video games:
 1. Sit or stand as far from the screen as possible.
 2. Play video games on the smallest available television screen.
 3. Do not play if you are tired or need sleep.
 4. Play in a well-lit room.
 5. Take a 10 to 15 minute break every hour.

WARNING - Radio Frequency Interference

The Nintendo DS can emit radio waves that can affect the operation of nearby electronics, including cardiac pacemakers.

- Do not operate the Nintendo DS within 9 inches of a pacemaker while using the wireless feature.
- If you have a pacemaker or other implanted medical device, do not use the wireless feature of the Nintendo DS without first consulting your doctor or the manufacturer of your medical device.

WARNING - Repetitive Motion Injuries and Eyestrain

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- When using the stylus, you do not need to grip it tightly or press it hard against the screen. Doing so may cause fatigue or discomfort.
- If your hands, wrists, arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists, arms or eyes during or after play, stop playing and see a doctor.

WARNING - Battery Leakage

The Nintendo DS contains a rechargeable lithium ion battery pack. Leakage of ingredients contained within the battery pack, or the combustion products of the ingredients, can cause personal injury as well as damage to your Nintendo DS.

If battery leakage occurs, avoid contact with skin. If contact occurs, immediately wash thoroughly with soap and water. If liquid leaking from a battery pack comes into contact with your eyes, immediately flush thoroughly with water and see a doctor.

To avoid battery leakage:

- Do not expose battery to excessive physical shock, vibration, or liquids.
- Do not disassemble, attempt to repair or deform the battery.

Actions

All of Link's actions can be performed by tapping or sliding your stylus on the Touch Screen.

Use your stylus to make Link run and attack however you want.

Basic Actions

Walk/Run/Jump/Roll

Link will move in the direction you touch. Touch and hold the stylus on the Touch Screen close to him to walk, or farther away to run.

Run over small gaps in the ground to make Link automatically jump.

While running, try repeatedly drawing small circles on the edge of the screen to roll in that direction.

If you roll too many times in a row, Link will get dizzy. Be careful!

Try drawing a small circle while Link is running.

Something might happen if you run into a tree and shake it by doing this move...

Talk/Check

Talk to people or read signs by tapping them. You can also tap anything that looks suspicious.

When a DS icon appears in a text window, make sure to look up at the top screen.

Pick Up/Throw

Tap rocks, pots, and barrels to pick them up. Then simply tap the place on the ground you want them to land to throw them. They will break when they hit the ground. You might just find something nice inside.

Just tap the place you want to throw the item!

Swinging Your Sword

During your travels you will find a sword. Of course, you can attack enemies by swinging your sword, but you can also cut grass, break pots, and flip switches as well.

Targeted Attack

Tap on an enemy to immediately swing your sword in the direction of that enemy and attack.

Slash Attack

Quickly slide the stylus in the direction that you want to swing your sword to attack in that direction.

Slide your stylus perpendicular to the direction that Link is facing to swing your sword.

Slide your stylus in the direction that Link is facing to stab in that direction.

Spin Attack

Slide your stylus in a circle around Link to make him swing his sword around him and perform a Spin Attack. Be careful: Link will get dizzy if he performs this attack too many times in a row.

Draw a large circle around Link.

This move comes in handy when you are surrounded by enemies or you want to cut a lot of grass.

Grab → Push/Pull

Tap blocks and levers to grab them and then tap the arrows to move them in that direction. Tap and hold the arrow to continue moving. Some blocks and levers can't be moved.

First, tap the block or lever to grab hold of it...

Next, tap the arrow to move it in that direction.

Items

Some items must be equipped before you can use them, and some items can be used right away. Try using equipped items in all kinds of ways!

Using Equipped Items

When you get a new item, it will appear equipped in the upper right-hand corner of the screen. When you want to use the item that you have equipped, tap the icon to hold it. Then you can use it! Tap Items (see page 10) on the Main menu to equip another item. Each item is used differently after it is equipped.

Tap the item you want to equip.

Tap the icon in the upper-right corner to hold it. And when you want to put it away...

Tap the icon on the upper right once more.

Boomerang

You can use your boomerang to attack enemies, break pots, flip switches, and pick up small items. Just draw the path that you want it to travel with your stylus. As long as it doesn't hit an obstacle, it will follow the path that you have drawn. If you are holding the boomerang, you can also tap an enemy to immediately hurl the boomerang at it.

Bombs

After you place a bomb, it will explode, blowing up enemies and breaking walls that have cracks in them. Throw bombs in the same way you would throw a pot or a rock (see page 14). But be careful—if you are too close to a bomb when it explodes, you will take damage!

Phantom Hourglass

The Phantom Hourglass is a mysterious item that you will find during your adventure. You'll have to discover this item's ability for yourself...

Replenishing Items

As you defeat enemies, cut grass, or break pots, you will find hearts and Rupees that you will pick up as soon as you walk over them. They are hidden in a variety of places, so try different ways of finding them.

Heart

These will replenish some of your Life Gauge (see page 9).

Rupees

Pick these up to earn Rupees you can spend at stores. The value of a Rupee depends on its size and color.

Heart Containers

If you find a Heart Container, the maximum number of hearts in your Life Gauge will increase by one and it will be completely filled.

Exchange Items with Other Players!

If you talk to someone named Freedle during your adventure, you can put ship parts or treasure (see page 12) in his magical boxes and exchange them with other players wirelessly using Tag Mode.

- 1 Place ship parts or treasure into the magic boxes (up to three).
- 2 Exchange items through one of the methods listed below.

- Speak to Freedle once again or choose Tag Mode from the File Selection screen (this option will only appear when you have placed items in the magical boxes; see page 8) and put your game into Tag Mode.
- Play a battle through wireless game play or over Nintendo WFC (see page 25).

- * When you are going to play Tag Mode, prepare first by checking "How to Play Over DS Wireless Communications (DS Wireless Play)" (see page 34).
- * While in Tag Mode, you will continue to search for other players even if you close your Nintendo DS.
- * While in Tag Mode, battery consumption will be greater than during normal play, so please be careful!

Safe Zones and Phantoms

In one cursed dungeon, there are special areas called Safe Zones and enemies called Phantoms.

Safe Zones

While in a Safe Zone, you will not be affected by the curse and the Phantoms can't reach you. You can also break red pots to create small Safe Zones.

Phantoms

Phantoms are fearsome enemies that protect the dungeon. They can't be defeated by being attacked, but if they hit Link, he will go down in one shot. The key is to move around the dungeon without the Phantoms seeing you. But if you are spotted, you can hide by running into a Safe Zone.

Ship Travel

Once you can get on the ship, you will be able to cross the seas and visit various islands.

As your adventure progresses, you will even be able to go fishing and salvage treasures from the deep.

Ship Screen

Travel by sea with the Sea Chart (see page 11) on the top screen while viewing your surroundings on the Touch Screen.

Ship's Life Gauge

This will decrease if you run into rocks or get hit by enemies. Damage will be repaired when you dock at a port.

Jump Button

Tap it to jump.

The yellow area is what you are currently looking at.

Ship's Surroundings

Look at what's around the ship.

Engine

Tap to alternate between Go and Stop.

Route

Tap this to draw a new route (see page 23) for the ship to take.

Drawing the Route

When traveling by ship, you will start by drawing a route (the path it will take) on the Sea Chart. Slide the feather pen to draw the route in one line. If you are happy with the route you have drawn, tap GO! If your destination is a port, the name of the island will be displayed.

This is displayed in yellow.

Look Around

Once you have drawn your route and are traveling at sea, you might be tempted to just wait until your ship automatically makes its destination... But doing this is dangerous! If rocks appear in front of the ship, you must redraw your route to avoid them. If an obstacle appears, you must jump over it! Always pay attention to your surroundings.

Beedle's Ship

Beedle's ship is a floating shop that travels on the sea. He carries ship parts and rare items. If you want to shop there, draw your ship's route so that it arrives at Beedle's ship.

The Shipyard

You can swap out the parts on your ship here. Choose Customize to swap out parts and View Ship to see how your ship looks now.

When Starting a Multiplayer Game

First, prepare two DS systems and two DS Game Cards and read "How to Play Over DS Wireless Communications (DS Wireless Play)" (see page 34). Both players should tap Multiplayer on the Battle Mode menu. Once an opponent has been found, your opponent's information will be displayed on the top screen. Each player then taps OK. The battle will start once a stage has been selected. (The player who gets to select the stage will be chosen at random.)

The battle begins! (see page 31)

*Turning the power off in the middle of a Wi-Fi Battle is considered rude. Please avoid doing so unless you absolutely have to.

When Starting a Wi-Fi Game

You can play against friends or other players around the world. Once you have set your Wi-Fi settings, select Nintendo WFC on the Battle Mode menu to connect to Nintendo Wi-Fi Connection. Choose the type of opponent you want to face. Once an opponent has been found, the stage will be chosen and the Battle will begin.

The battle begins! (see page 31)

Nintendo WFC Setup

Set your Nintendo Wi-Fi Connection settings by selecting Nintendo WFC Setup from the File Selection screen (see page 7).

Nintendo Wi-Fi Connection allows multiple The Legend of Zelda: Phantom Hourglass owners to play together over the internet—even when separated by long distances.

- To play Nintendo DS games over the internet, you must first set up the Nintendo Wi-Fi Connection (Nintendo WFC) on your Nintendo DS system. Please see the Nintendo Wi-Fi Connection instruction booklet, available at www.nintendo.com/consumer/manuals if you need directions on setting up your Nintendo DS.
- To complete the Nintendo WFC setup, you will also need access to a PC that has a wireless network device installed (such as a wireless router) and an active broadband or DSL internet account.

- If you do not have a wireless network device installed on your PC, you can order a Nintendo Wi-Fi USB Connector (sold separately) directly from Nintendo. See the separate Nintendo WFC instruction booklet for more information.
- Nintendo Wi-Fi Connection game play uses more battery power than other game play. You may prefer to use the AC Adapter to prevent running out of power when using the Nintendo Wi-Fi Connection.
- You can also play Nintendo WFC compatible games at selected internet hotspots without additional setup.
- See the Terms of Use Agreement (see page 36) which governs Nintendo Wi-Fi Connection game play and is also available online at www.nintendowifi.com/terms.

For additional information on the Nintendo WFC, setting up your Nintendo DS, or a list of available internet hotspots, visit www.nintendowifi.com (USA, Canada and Latin America) or call 1-800-895-1672 (USA/Canada only).

Choose Your Opponent Type

You can choose from five different types of opponents. Skill level refers to Battle Point count (see page 25).

Vs. Friend:	Battle against someone you have exchanged friend codes with.
Vs. Rival: (N. America)	Battle against someone with a matching skill level in N. America.
Vs. Rival: (Worldwide)	Battle against someone with a matching skill level in the world.
Vs. Anyone: (N. America)	Battle against anyone in North America.
Vs. Anyone: (Worldwide)	Battle against anyone in the world.

*When you play over Nintendo Wi-Fi Connection, the name you use will be seen by everyone you play with. Please make sure that your name does not contain any personal information or is not offensive.

Friend Codes

Your friend code is a 12-digit number that you are assigned the first time you connect to Nintendo Wi-Fi Connection. You can battle against friends you have registered to your friend roster by selecting Vs. Friend.

- * People you have battled over Multiplayer (see page 26) will automatically be registered to your friend roster.
- * Friend codes were created to ensure a safe gaming experience for players by making it possible for them to play only people they know. If you exchange friend codes with someone you don't know, you might become vulnerable to receiving altered data or unwanted messages. Please do not share your friend code with people you do not know.

The nickname you use will be seen by others when playing multiplayer games using Nintendo WFC.

To protect your privacy, do not give out personal information such as last name, phone number, birth date, age, e-mail address, or home address when communicating with others.

DS Download Play

To play over DS Download Play, first prepare one Game Card and two DS systems and read "How to Play Over DS Wireless Communications (DS Download Play)" (see page 35).

- 1 The parent system (the DS system with the Game Card inserted) selects DS Download Play from the Battle menu and the child system (the DS system without the Game Card inserted) will download the data.
- 2 Once the guest's name appears on the parent system's screen, the parent will tap OK. The data will be sent from the parent system to the child system, the parent system will select the stage, and the battle will begin.

The battle begins! (see page 31)

Battle Start (How to Play)

In Battle Mode, Player 1 (red) competes with Player 2 (blue) to try to take the most yellow triangles, called Force Gems. (Players 1 and 2 will be determined at random.) Each player will have a chance to play once as Link (offense) and the three Phantoms (defense) in a Round. There are three Rounds in a game, and the player who has the most points at the end wins.

Basic Rules

- ▶ Pick up Force Gems and set them in your base to earn points.
- ▶ There are three sizes of Force Gems (large, medium, and small). The larger the Force Gem, the heavier it is and the harder it is to carry, but the more points it is worth.
- ▶ When time runs out or when Link is caught by a Phantom, the turn will end and players will switch.
- ▶ Shortly after a game has started, helpful items will appear on the screen. There are many different types of items. Red items are for Player 1 and blue items are for Player 2. You will grab your own items if you pass over them. Running over your opponent's items will break them.

Playing as Link

Your goal as Link is to carry as many Force Gems to your base as possible without being caught by a Phantom.

- ▶ You can only see Phantoms on your map when you are carrying a Force Gem.
- ▶ You can enter Safe Zones. When in a Safe Zone, Link will disappear from the map of the player controlling the Phantoms.
- ▶ Force Gems will turn the color of bases they are set down in. They will turn back to yellow when they are placed in a Safe Zone.

Playing as the Phantoms

Your goal is to protect the Force Gems from being taken by Link! Defeat Link to end the turn.

- ▶ Control the Phantoms by drawing lines on the map. They will follow the route you draw.
 - * While the Phantoms are moving, you can draw another line to change the path.
- ▶ Link's turn will end if you catch him. (The Phantoms will automatically attack when they come close to Link.)
- ▶ Phantoms can't enter Safe Zones or see Link when he is in a Safe Zone.

Link is controlled on the Touch Screen. While playing Link, watch the location of the Phantoms on the top screen. The Phantoms are controlled by drawing paths on the Touch Screen. While playing as the Phantoms, watch their movements on the top screen. You can swap between the Phantoms on the top screen by pressing the L Button or R Button. Items and bases are the same color as Player 1 and Player 2.
